

Create a case from the attention console

1. Log into IthelpCenter portal. In the main menu select *Case Management > Console*

2. In the *console tool panel*, on the right side of the screen, click on the button **Create new CAT**, the following case form will open:

1
Select an User
a. Click on the **Change** button, a search window will open, enter a search criteria (first name, last name, employee number, etc.) or select directly from the full list of users.
b. Once the user record is selected, click on the **Use Selected Record** button.

3
Select Urgency
Select a value from the drop-down list

5
With the SLA, the **Impact** will also be selected. The **Priority** is automatically calculated based on **Urgency and Impact**.
Note:
The impact and priority can be changed in the the corresponding drop-down list fields.

6
Complete the case **Title (subject)** and **Description (More detailed information)**.
These fields can be auto completed by checking the boxes next to each field.
To attach files to the case, use the Attach File tool.
[See Case Creation Tools](#)

Complete the following form

Case number: 9

Select user:

Change (Usr 001) Jordan Ford Franklin

Notification Method:

Add eMail (lever.Test@)

Urgency: Is major: * Enable when the case is major or highly urgent *

Select Category

Category: IT Service\Hardware Support **Change**

Details: Keyboard, mouse or other devices do not work properly

Id	MD	SLA	SLA name	Model	Calendar	Max time	Normal time	Model Description
1			General Incid...	General Incid...	Default	480	120	The main objectiv...

Description

Impact: Priority:

Title: Devices issues

Description: Keyboard isn't working and monitor does not turn on

* Major incidents: Damage caused by these kind of incidents can quickly escalate and/or prevent users from completing sensitive work.

2
Notification Method
Depending on the selected user, the notification method assigned to the user will be preselected (Mail, Phone or Mobile)
If enabled, mail notifications for case-related events will be automatically sent to the user

4
Select category
a. Click on the **Change** button, the search window will open for selection of the services available in the catalog.
b. Ways to search in the catalog: Select from the drop-down fields **by Category** or click on the button: **Normal Search**, in the text field enter a keyword or phrase.
In this mode the **Exact Phrase checkbox filters the matches found.*
c. Click on the **Select** button next to the category that most accurately describes the issue.

According to the category selection from the service catalog, the **SLA and the service model** will be automatically preselected.
Notes:
When there is more than one result, the SLA can be selected in the grid.
If there are Workarounds associated to the selected category(ies), a link will appear to consult them.

Category selection, search modes:

1. With the **CATEGORY SEARCH** mode, select in the drop-down field(s) the categories, according to the **INCIDENT** to be reported

Select category: ✕

Normal search
Click to switch to Normal search mode

Select category

Category 1 IT Service ▼

Category 2 Hardware Support ▼

Category	Category Detail	Path	Knowledge	Action
Incident	Keyboard, mouse or other dev...	IT Service\Hardware Support	0 Self Help:	Select
Incident	Monitor issues	IT Service\Hardware Support	0 Self Help:	Select
Incident	Desktop or laptop issues	IT Service\Hardware Support	0 Self Help:	Select
Problem	Hardware problem	IT Service\Hardware Support	0 Self Help:	Select
Request	Hardware request	IT Service\Hardware Support	0 Self Help:	Select

1 ➤

2. When using the **NORMAL SEARCH** mode, enter at least 3 letters of the keyword to be searched for matches in the catalog.

Select category: ✕

Search category

Enter words or phrases that best describe the software or application

Enter at least 3 characters to search for coincidences 🔍

Exact Phrase

Category	Category Detail	Path	Knowledge	Action
Incident	Keyboard, mouse or other devic...	IT Service\Hardware Support	0 Self Help:	Select

After selection, the SLA and service model will be automatically calculated:

Id MD SLA	SLA name	Model	Calendar	Max time	Normal time	Model Description
1	General Incidents	General Incident	Default	480	120	The main objective is to ...

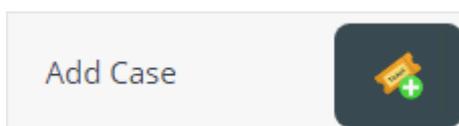

3. **Optional: Additional forms**

Besides the case form, additional forms and fields can be configured according to the model type. When enabled, these forms will be displayed after the model automatic calculation while filling the main case form.

Forms may include:

- **One or more fields of type:**
Text, numeric, decimal, Date/time selectors, checkboxes.
- **Drop-down fields and buttons to validate information.**
- **Mandatory or optional fields.**
- **New, save and delete buttons:**
Allows to include more than one record per form, which relate to the same case.

4. Once the case creation form has been filled out, click on the **Add case** button located on the [case creation tool panel](#).

Case Creation Tools

After clicking on Create New CAT button the case creation form will open and the following tools will be available also:
